Please contact them directly as I am responding to many inquiries regarding our work on the spill.

Also, I've asked Hoang to collect an air sample via TO-15 - mainly to see if we can see the compound in the air since this was tried at the site. If we do see anything we'll share with you.

OK.

Adam, Jenny, Eric: What room numbers?

Just when door is opened.

Folks to contact would be Adam, Eric, and Jennie.

Please include John Curry in any of these discussions as he was the person who handled the cooler etc.
His gloves and materials were stored in the walkin refrigerators

Ex. 5 - Deliberative

Ex. 5 - Deliberative

We are also experiencing vapors in the refrigerators where standards/aliquots are being stored. Let us know if we need to take any action to reduce vapor release???

We have copies of all MSDS and I believe these were forwarded to Susan. Let me know if you need any more.

The material that arrived as a sample is a mixture of Crude MCHM/Crude PPH from a tank (so product material and not a water sample).

Cindy

Copy that.

EMS: FYI. Cooler with samples from the WV Spill incident have an odor associated with them. We'll need to discuss decontamination and waste implications.

Skip,

Smell is definitely there

Ex. 5 - Deliberative

Ex. 5 - Deliberative

I found gloves and wipes in trash can
Put both bags in hood.

Ex. 5 - Deliberative

I found other gloves in glass waste.

One cooler smelled (might be the one sample shipped in?) and I put two coolers in the hood. One cooler was already in the hood.

Cindy
